Section 4: First Aid Measures

4.1 Description of first aid measures

Inhalation | Move the exposed person to fresh air. If breathing stops, provide artificial respiration.
Eye Contact | Rinse immediately with plenty of water for 15 minutes holding the eyelids open. Seek medical attention.
Skin Contact | Remove all contaminated clothes and footwear immediately unless stuck to skin. Wash off immediately with plenty of soap and water. Seek medical attention if irritation or symptoms persist.
Ingestion | DO NOT INDUCE VOMITING. Never give anything by mouth to an unconscious person. Rinse mouth thoroughly. Seek medical attention.
General Information | If you feel unwell, seek medical advice (show the label where possible).

Section 5: Firefighting Measures

5.1 Extinguishing media | Use extinguishing measures that are appropriate to local circumstances and the surrounding environment
5.2 Special hazards arising from substances or mixture | No data available
5.3 Advice for firefighters | Wear suitable respiratory equipment when necessary

Section 6: Accidental Release Measures

6.1 Personal precaution, protective equipment and emergency procedures | Wear suitable protective clothing. Avoid breathing vapours, mist or gas. Avoid formation of dust. Ensure adequate ventilation of the working area. Evacuate personnel to a safe area.
6.2 Environmental precautions | If safe to do so, prevent further leakage or spillage. Do not let product enter drains.
6.3 Methods and materials for containments and cleaning up | Avoid raising dust. Sweep up. Transfer to suitable, labelled containers for disposal.

Section 7: Handling and Storage

7.1 Precautions for safe handling | Handle in accordance with good industrial hygiene and safety practice. Never carry a bottle by its top. Avoid formation of dust. Ensure adequate ventilation of the working area.
7.2 Conditions for safe storage including any incompatibilities.

Keep containers tightly closed in a dry, cool and well-ventilated area. Chemicals with hazard class 4.3 are best kept in a separate box or cupboard away from water, water-based reagents and other flammable chemicals. Do not store in the flammables cupboard. Never store flammable chemicals in the same room as gas cylinders. Keep away from oxidising agents. Keep in properly labeled containers.

General principles of chemical storage: Store the minimum stock levels of hazardous chemicals, always disposing of chemicals that are no longer required. Store large breakable containers, particularly of liquids, below shoulder height. Ensure containers and bottle tops are sealed properly to avoid unnecessary leakage of vapours. Ensure hazard labels are clear and never store in direct sunlight.
